EDUCATION

Shree Guru Gobind Singh Tricentenary University

Bachelor of Technology in Computer Science; GPA: 9.01

Gurugram, India

Jul 2024 – Jul 2027

Parul University

Diploma in Information Tech

Vadodara, Gujarat, India

Jun 2021 – Jun 2024

EXPERIENCE

Intern

Nextgen Technologies

Feb 2024 – Apr 2024

Vadodara, Gujarat (On site)

- Managed **Linux server infrastructure and network configuration**, handling subnet access, firewall rules, and service availability monitoring to ensure zero-downtime deployment across multi-tenant web environments

AI & Cloud Intern

IBM Cloud

Dec 2023 – Jan 2024

Virtual

- Architected **end-to-end data preprocessing pipelines** on IBM Cloud, converting unstructured datasets into **ML-ready JSON formats** with multi-layer validation ensuring data integrity

PHP Intern

MySphere Infotech

Aug 2023 – Oct 2023

Vadodara, Gujarat (On site)

- Built full-stack e-commerce platforms in PHP, engineering **WooCommerce-REST API integrations** with third-party payment gateways to automate end-to-end business transactions

PROJECTS

DSA - Versus | *Real-Time Competitive Coding Battle Platform*

In Progress

- Building a full-stack platform where users compete head to head solving DSA problems with a shared live timer and rankings, using **Next.js (App Router)**, **React**, **Tailwind CSS**, and **Monaco Editor**
- Using **Supabase (PostgreSQL)**, authentication (email and GitHub OAuth), and **Realtime subscriptions** to sync battle state and timers live across all connected clients
- Integrating a self-hosted **Judge0 CE** engine via **Docker** and **Cloudflare Tunnel** for sandboxed execution, deployed on **Vercel** with server-side **API routes and Server Actions**

MedFlow | *Hospital Management & Referral System*

State-Level Hackathon, Finalist

- Architected a referral and patient management system with role-based auth, enabling **real-time hospital coordination** with controlled state transitions (pending → accepted/rejected/completed)
- Engineered **location-aware hospital discovery and resource tracking** using MongoDB geospatial indexing, enabling real-time visibility into bed, ICU, staff, and equipment capacity

Redditor | *Multi-Language Code Translation Platform*

redditorcode.vercel.app

- Engineered a **real-time code translation system** supporting **19+ languages** using an **AST-based parser** fused with **LLM inference pipelines**, achieving sub-second conversion (Java → Python/C++)

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, C++, Kotlin, PHP, Ruby, SQL

Frameworks: MERN React.js, Next.js, Redux, Node.js, Express.js, Ruby on Rails, Tailwind CSS

Developer Tools: AWS, Docker, MongoDB, PostgreSQL, MySQL, Redis, Supabase, Vercel, Cloudflare, Git, GitHub, Linux, IBM Cloud

Libraries & Concepts: REST APIs, JWT, OAuth, WebSockets, System Design, Data Structures & Algorithms, LLM Integration, Prompt Engineering, AST-Based Parsing

CERTIFICATIONS & CO-CURRICULAR

- Oracle Infrastructure and AI Foundations Associate** – Certification, Oracle Cloud (Oct 2025)
- Community Admin, Peer Mentorship – Cloud Computing** – Student Mentor, SGT University (Jul 2025 – Present)
- Training and Placement Coordinator** – Parul University (Aug 2022 – Jun 2024)
